Excellent Performance.
 Easy maintenance.
 Sturdy and reliable.
 Elegant design.

Optimal
 Performance for
 Day-to-day use.

FEATURES

- 64 mm grinding burrs
- Display to visualize the selected dose, the granulometry and maintenance checkup
- Double and single dose set electronically and independently
- Micrometric screw adjustment of grind setting: the value directly visible on display
- Micro-switch to protect baristas when the hopper is released
- Available with/without coffee tamper

The Enea on Demand by Casadio is a great entry-level grinder, with its 64 mm flat burrs and 2.65 lbs. bean hopper. The grinding process is all handled through the push button display, giving you complete control over how fine or coarse you want your coffee to be and the time of your shots. Removing the bean hopper is easy and safe, as the grinder automatically shuts off when you unscrew the micro-switch.

With the automatic grinder-doser Enea on demand, the whole coffee beans are ground directly in the filter holder before the espresso is extracted. Easy to use and precise, it grants a better in-the-cup aroma.

Programmable Dosing

A simplified grinding process. The programmed grinder features buttons where you may save timings for single and double shots. Once the correct dose is set, click the appropriate button and wait for the exact amount of espresso to be delivered.

Micrometrical Adjustment

With the micrometrical adjustment, the Enea On-Demand coffee grinder is able to accomplish this quickly and with the kind of finesse you would expect to find in a premium quality coffee grinder.

Easy Maintenance and Upkeep

Whether you are an experienced barista who is familiar with working a coffee grinder or a beginner who is just getting started with their coffee brewing, the Casadio Enea On-Demand coffee grinder takes the guesswork out of maintenance and upkeep.

The Enea features the ultimate feature to ensure you always receive the strongest coffee: a doserless mechanism. Simply said, rather than grinding larger amounts into a holding chamber in preparation, the grinder grinds straight into your portafilter.

	ENEAS ON-DEMAND
