**Unique design and new technology** that never fails to assure great quality in every cup.

## FEATURES

GTi FAEMA Thermal System (GTi)

Temperature with Knobs (Termosifonica)

AutoSteam Milk 4 Cold Touch (optional)

Tall cup version (adjustable tray)

PGS (Perfect Grinding System)

Green Machine

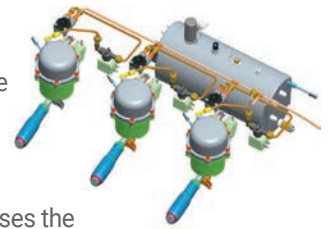

Mixed Water

Smart Boiler

## GTi with independent coffee boilers.

Absolute control and consistency in cup result. The GTi regulation with thermo-controlled and independent groups are able to manage different origins of coffee respecting the specific temperatures and the infusion times of each.

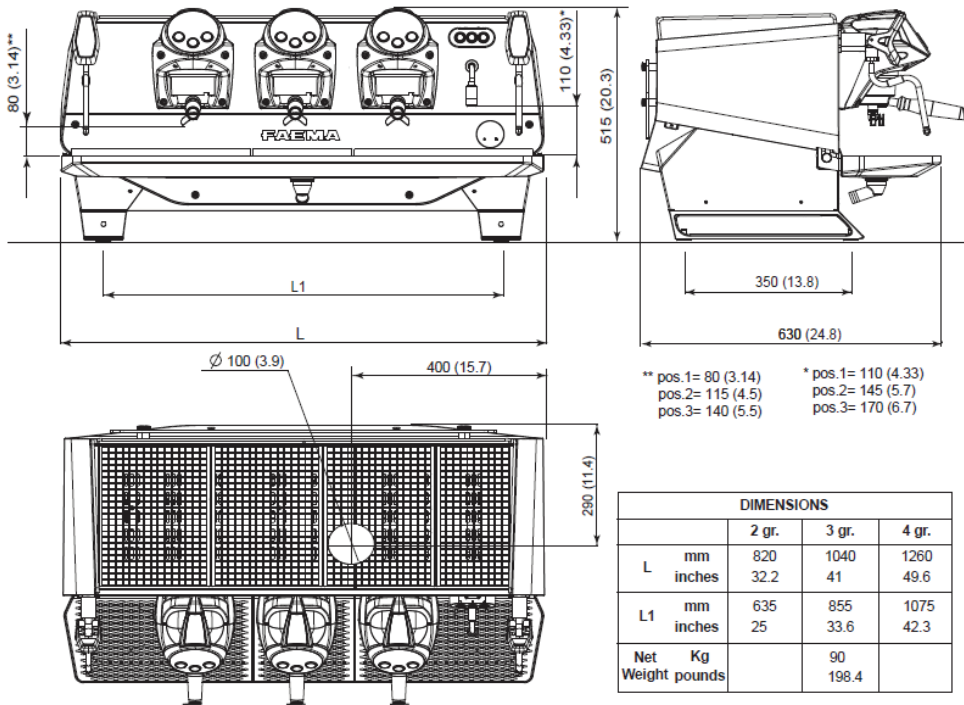

**The patented Smart Boiler technology** increases the performance levels of hot water and steam while optimizing the water level in the boiler. This ensures thermal balance so you can consistently have a perfect cup even under conditions of maximum use.

## AutoSteam Milk 4 (Optional)

The Auto Steam Milk4 is a steam wand that, in addition to dispensing steam mixed with air like the traditional Auto Steam (patented), is characterized by a terminal that allows you to mount or heat even small amounts of milk (of approx 50 cc). It allows 4 milk recipes. The temperature and emulsion level are established during the programming phase and can be modified directly by the barista to suit their needs for each of the 4 selections.

Metal & wood style in perfect match between inox pewter, the wood of the filter holders and the new steam levers, and the back panel in tempered glass.
