

MODEL: FAEMA X1 GRANDITALIA MILK PS
FAEMA X1 GRANDITALIA Autosteam

ITEM: F01-CYLP9EIBT999A
F01-CYMI9EIBT999A

Date:

Project:

Location:

Designed for locations where espresso coffee is not the core business and space is limited.

X1

FEATURES

Up to 150 cups/day

SMART Boiler

MilkPS System

Autosteam Milk4

Self Washing System

Easy to use, X1 guarantees a superior in-the-cup quality.

X1 delivers a complete coffee menu utilizing coffee beans and fresh milk. The quality of the beverages is guaranteed by LaCimbali's renowned expertise in espresso extraction and by innovative milk frothing devices such as the TurboSteam and the MilkPS.

AUTOSTEAM

A steam wand that simultaneously delivers steam and air, allowing the hands-free heating or frothing of large amounts of milk without manual intervention (patented).

MILKPS

The MilkPS system allows frothing the milk either without heating it by using the air only, or heating it by using air and steam, delivering an even wider milk menu.

Thanks to the exclusive MilkPS, you can:

- create a pressurised flow to obtain a consistent in-the-cup milk dose;
- customize milk temperature for each selection (patented);
- deliver milk portions at different temperatures to prepare stratified beverages.

Manual or Digital Control System

The choice of working manually or of using the digital control system, with its integrated touchscreen display brings remarkable flexibility and technical innovation to the world of traditional coffee machines.

SMART Boiler

A patented boiler management system, which significantly boosts steam and hot water capacity, thus avoiding production drops also during rush hours.

Self Washing System

The machine automatically performs programmable wash cycles during working hours. The new milk frother is easy to disassemble and clean. The gear pump assures ideal hygiene conditions by automatically emptying the milk circuit at the end of each delivery cycle.
